

JLG Forklift Parts

JLG Forklift Part - After retiring in the late 1960's, John L. Grove started out on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road expedition.

All through their journey, John reacquainted himself with previous business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial market for a product that could swiftly and securely elevate individuals in the air to accomplish maintenance and other construction functions.

After returning from their trip, John set up a joint venture with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the basic design essentials of that original lift into current versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into many different global marketplaces and continues to develop new machines to ensure that customers are able to become safer and more resourceful within their workplace.
