

Doosan Forklift Part

Doosan Forklift Part - Doosan Infracore Company Ltd. is an international and intercontinental organization that consists of Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

Their United States partner, Doosan Infracore America Corporation, located in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Moreno Valley houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction client needs.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. What's more, there are more than 90 independent dealers moving forklift equipment and materials handling equipment. This network permits Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line impressively includes 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these various truck versions vary from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest expanding lift truck company in the North American market, due to their stability in retaining a high level of customer service excellence and optimum product functioning to all Doosan Infracore Forklift users. The U.S. lift Truck division situated in Cleveland has a expert team experienced in Sales, Purchasing, Marketing, Logistical and Technical Support.

Originally the home-based forklift marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a domestic machinery expansion project. Sales of these products were originally targeted to state-run firms, large scale organizations, and the armed forces. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for improving quality and product development.

Daewoo started the first domestic forklift business in 1967, and rapidly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a position of considerable expansion of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the very competitive North American materials handling industry. This project proved highly successful for Daewoo and their forklift sales expanded greatly. In 1984, the company finished development of a new facility to help in manufacturing high end value-added products for export. In 1993, the corporation had a international sales network and started exporting versions they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international marketplaces.
